

EXETER AREA GARDEN CLUB 2023 MINI-GRANT PROGRAM SPECIAL OFFERING FOR EXETER AND STRATHAM RESIDENTS ONLY

The Exeter Area Garden Club is looking to establish a pollinator corridor running through the towns of Exeter and Stratham. This program will seek to establish a corridor of private properties that provide native plant habitat and nutrition for pollinators. This will be a multi-year project. We are encouraging local gardeners to reassess their home gardens and see how they might change existing gardens or establish a new garden which will consist of native plants (especially those which are drought tolerant) so that pollinators will be attracted to the area and hopefully reside in your gardens.

Applications should include a description of your proposed pollinator garden, or the changes you plan to make to an established garden. We require submission of a plan and a before photo of the garden area. Later in the summer we would ask that members of the mini-grant committee be allowed to visit the garden to see how your project has worked out for you. Since we are hoping to establish a pollinator corridor within the town, we are hopeful that these projects will continue in the years ahead. That is one reason we have opened the process this year to gardens not visible from a public way.

FUNDS

\$100-\$200 will be awarded for each chosen project, to be completed by the end of summer 2023.

ELIGIBILITY

This special offering is open to Exeter and Stratham residents only.

ELIGIBLE USE OF FUNDS

Funds are to be used only for the purchase of native (to NH) perennial pollinator plants with emphasis on drought tolerant species. Please note, this excludes non-native cultivars.

INELIGIBLE USE OF FUNDS

Since we are promoting garden change, nothing other than the eligible plants may be purchased with the awarded funds.

ACCOUNTING

Applicants shall maintain an accurate record of plants and/or seeds purchased and shall submit, if requested, these records upon completion of the project. Grant recipients should notify the committee upon completion and submit a photograph of the completed project.

CRITERIA

In addition to the items listed above, we ask that a plan is in place for maintenance of the project, which includes, watering and weeding. We suggest that the gardens not be treated with pesticides.

DEADLINE FOR APPLICATION

Your application must be received by Saturday, April 1, 2023.

NOTIFICATION OF GRANT

Applications will then be reviewed and applicants will be notified by April 15, 2023. Funds will be sent out at that time.

EXETER AREA GARDEN CLUB - 2023 SPECIAL POLLINATOR MINI-GRANT APPLICATION

Project Start Date

Project Finish Date

Project Objective: Attach proposal including the following items.

- What do you hope to accomplish?
- Please provide a list of proposed plants to be purchased, remembering that awards will be given to those using native (to NH) perennial pollinator plants.
- Please describe how the addition of these plants will enhance your existing landscape (photo or site plan required) or allow you to establish a new area in your landscape (photo or site required).
- Your maintenance plans.

Return application to be received by Saturday April 1, 2023
